Call In: 866-299-3188
Passcode: 404-562-8771#

All,

Glenn Adams usually sends out these messages. We have calls planned for Tuesday and Thursday. I realize that the email list above may contain more people than usual, but see

the message below as a reminder of last week's discussion on using some of this regular EU coordination call to help us deal with clarifications on data reporting and other related issues. If I've left anyone off of this email, please pass it along.

Thanks,
Marc

Subject: Fw: Data Issues Process

Dear Air, Water/Sediments, and Planning Section Colleagues,

For those of you who haven't met me yet, I am serving in your Region as the Environmental Unit (EU) Leader in the emergency response to the Deepwater Horizon Incident. There have been some issues that the Headquarters EOC EU has identified with regard to the data we are delivering out of the EU, Air, and Water/Sediments groups on a daily basis. Please see the list of examples below that outline some of these issues. I suggest that the best way to address these issues is to utilize the excellent communication device that already exists--that is the biweekly Region 4, 6, and HQ-EU calls that we hold at 9 AM each Tuesday and Thursday. These calls have not been agenda driven, but have been a useful opportunity for us to share our activities.

Given the questions and issues that are coming from the HQ-EOC users of the data, Glenn Adams (Region 4 EUL), Jon Rauscher, Don Williams, and I have discussed a path forward. We propose the following general agenda for an up to 1 hour call, and each time slot should be considered as up to 15 minutes:

- 15 minutes - Air update
- 15 minutes - Water/Sediment update
- 15 minutes - Regional EU Leaders update on general EU activities/issues
- 15 minutes - HQ-EOC-EU updates

We see this as a good general and efficient template. During each of the air, water/sediment, and Regional EU updates we can hear from our HQ colleagues on their questions and clarifications they are seeking. We recognize that not all

issues (e.g., field related data entry and recording issues, lab issues) can be dealt with on this call, but those can be taken to the "right people" by the EU Leaders once they have been identified.

What this means for us all is that we need regular attendance by at least one representative of each of our group contributors to the daily data reporting from the Regions to HQ. That would be extremely helpful to help manage the issues as we move forward.

If you have any questions, please call me, Jon, or Glenn.

Many thanks for your continued efforts on this response,
Marc Greenberg
